SUMMARY

Enthusiastic Artificial Intelligence undergraduate with a strong foundation in programming, Machine Learning, Deep Learning, , NLP, Cyber Security, and data-driven problem solving. Experienced in developing AI solutions, , and deep learning models with Python, TensorFlow, Flask, and Streamlit. Passionate about leveraging artificial intelligence and data analytics to solve real-world challenges and create innovative technology-driven solutions.

EXPERIENCE

❖ Artificial intelligence, Code Alpha01May 2026 — 30May 2026

Developed machine learning models using Python, performed data preprocessing and model evaluation, and worked on end-to-end ML workflows.

❖ Academic Projects, UOKApr 2024 — Dec 2025
Pak

Student Performance Prediction System

Project is based on laptop price prediction, which analyzes laptop features to predict their estimated price. It helps users make informed purchasing and pricing decisions.

Laptop Price Prediction System

Built a laptop price prediction model using Python and machine learning to predict laptop prices from hardware specifications.

Language Translation Tool System

Implemented a language translation tool using Python and translation APIs, enabling real-time text translation between multiple languages.

Object Detection and Tracking System

Implemented real-time object detection and tracking using Python, OpenCV, and YOLO to identify and track objects in video streams.

EDUCATION

❖ University of Kotli Jan 2023 — Jan 2027

Bachelor of Science, Artificial Intelligence

Kotli, Azad Jammu & Kashmir

GPA: 3.0/4.00 Relevant Coursework: Computer Vision, Machine Learning, Deep Learning, Data Structures & Algorithms, Database Management

SKILLS

Python

SQL

LSTM

Matplotlib

Problem Solving

Decision-Making

C++

CNN

OpenCV

Image Processing

Team Collaboration

Documentation
